From Nina at DTSC. I didn't tell her why I needed the info. But she was kind enough to help search, since their filing system is more accessible than ours (it's an open room library), and she sometimes has records that the Superfund Records Center doesn't have.

Subject: RE: 2015 Workplan for rad removals & 2013 SUPRA for Parcel C

Lily,
The incident that started the anomalous soil sample issue (2012) was soil samples collected from building 517 which is in Parcel E. The Parcel E 500 SERIES AREA Execution Plan (2011; attached) refers to this document and two other work plans for the parcel rad remediation: Base-wide Radiological Work Plan, Revision 1, (October 5, 2007: TtEC), and the Basewide Radiological Support Sampling and Analysis Plan for sample analysis: Final Execution Plan, Basewide Radiological Support, Attachment 1, (Jan. 2011, TtEC). I'm sure these applied to Parcel C as well. I couldn't find a specific abstract; only the one for the sewers and storm drains.

http://www.envirostor.dtsc.ca.gov/public/final_documents2.asp?global_id=38440002&doc_id=60267150

Couldn't find the 2nd one. I'll have to search the file room.

Nina

Here are the closest things I could find. If you have earlier ones, and they're similar to these, that would be good to know.

- 1 - the latest (2015) workplan w/details, and a description of .
- 2- description of storm drain & sewer removal progress that occurred in 2013

Unfortunately #1 & #2 don't apply to the time period when previous anomalous samples were found.
